

NATHAN CHAIM

נתן חיים

AI systems implementer

PROFILE

I'm a fast learner with a strong interest in AI, automation, website building, and digital content creation.

During my studies, I built several websites and gained hands-on experience with tools such as n8n, Make, ChatGPT, APIs, Canva, Claude, Lovable, Manus, Gemini, VS Code, and Codex.

I'm motivated, creative, and always looking to improve my skills. I enjoy learning new technologies and using them in practical ways. I also have experience working in fast food, where I learned responsibility, teamwork, customer service, and working under pressure.
